

It takes exceptional people to develop exciting products. For our R&D we are looking for

Developer Embedded Hardware (m/f/d)

Yellowtec manufactures intuitive and exciting audio products for broadcasters, podcasters and audio professionals. Are you ready for a new challenge?

Expand our team in the areas of

- > designing digital audio hardware
- > circuit development + PCB layout
- > layout of testing procedures

You benefit from

- > an open corporate culture with room for personal development
- > plenty of opportunities to implement your own ideas
- > flexible working hours
- > the spirit of a wonderful gang

We are seeking

an engineer with solid experience in hardware development.
Great, if you also had some understanding of audio requirements.
You will work together within a fast-paced team of software engineers.

The position can be located in Monheim am Rhein (NRW)
or Leipzig (SN) and is immediately available.

Do you want to become a part of our team?
Get in touch and send us an email!

Yellowtec
Heinrich-Hertz-Str. 3
