

It takes exceptional people to develop exciting products. For our R&D we are looking for

PCB Designer / Layouter (m/f/d)

Yellowtec manufactures intuitive and exciting audio products for broadcasters, podcasters and audio professionals. Are you ready for a new challenge?

Expand our team in the areas of

- > designing PCBs
- > routing processor based circuits

You benefit from

- > an open corporate culture with room for personal development
- > plenty of opportunities to implement your own ideas
- > flexible working hours
- > the spirit of a wonderful gang

We are seeking

an engineer/career changer with a background in PCB design + experience in layouting. Great, if you also had some understanding of audio requirements. You will work together within a team of hardware developers.

The position can be located in Monheim am Rhein (NRW) or Leipzig (SN) and is immediately available.

Do you want to become a part of our team?
Get in touch and send us an email!
